advanced technologies in wastewater treatment wastewater treatment in the leather industry provides a state of the art overview of conventional and emerging technologies for the treatment of wastewater originating from the leather industry the book pays special attention to the efficiency of these technologies as well as on environmental control strategies it focuses specifically on wastewater management and recovery of primary resources in the leather industry providing the latest developments in this field as well as applications of conventional and emerging technologies the book is an indispensable resource for post phd students researchers at universities and research centers as well as for professors in chemical engineering and chemistry at technical universities includes the latest developments on the treatment of wastewater from leather industry describes emerging technologies for pollution control studies the integration of conventional and innovative procedures to decrease waste energy and water use

from the infinitesimal scale of particle physics to the cosmic scale of the universe research is concerned with the nature of mass while there have been spectacular advances in physics during the past century mass still remains a mysterious entity at the forefront of current research our current perspective on gravitation has arisen over millennia through the contemplation of falling apples lift thought experiments and notions of stars spiraling into black holes in this volume the world s leading scientists offer a multifaceted approach to mass by giving a concise and introductory presentation based on insights from their respective fields of research on gravity the main theme is mass and its motion within general relativity and other theories of gravity particularly for compact bodies within this framework all articles are tied together coherently covering post newtonian and related methods as well as the self force approach to the analysis of motion in curved space time closing with an overview of the historical development and a snapshot on the actual state of the art all contributions reflect the fundamental role of mass in physics from issues related to newton s laws to the effect of self force and radiation reaction within theories of gravitation to the role of the higgs boson in modern physics high precision measurements are described in detail modified theories of gravity reproducing experimental data are investigated as alternatives to dark matter and the fundamental problem of reconciling any theory of gravity with the physics of quantum fields is addressed auxiliary chapters set the framework for theoretical contributions within the broader context of experimental physics the book is based upon the lectures of the cnrs school on mass held in orl ans france in june 2008 all contributions have

been anonymously refereed and with the cooperation of the authors revised by the editors to ensure overall consistency

implementing energy efficient cpus and peripherals as well as reducing resource consumption have become emerging trends in computing as computers increase in speed and power their energy issues become more and more prevalent the need to develop and promote environmentally friendly computer technologies and systems has also come to the forefront

this book covers several cutting edge topics and provides a direct follow up to former publications such as intent based networking and emerging networking bringing together the latest network technologies and advanced ai applications typical subjects include 5g 6g clouds fog leading edge llms large scale distributed environments with specific qos requirements for iot robots machine and deep learning chatbots and further ai solutions the highly promising combination of smart applications network infrastructure and ai represents a unique mix of real synergy special aspects of current importance such as energy efficiency reliability sustainability security and privacy telemedicine e learning and image recognition are addressed too the book is suitable for students professors and advanced lecturers for networking system architecture and applied ai moreover it serves as a basis for research and inspiration for interested professionals looking for new challenges

process systems engineering brings together the international community of researchers and engineers interested in computing based methods in process engineering this conference highlights the contributions of the pse community towards the sustainability of modern society and is based on the 13th international symposium on process systems engineering pse 2018 event held san diego ca july 1 5 2018 the book contains contributions from academia and industry establishing the core products of pse defining the new and changing scope of our results and future challenges plenary and keynote lectures discuss real world challenges globalization energy environment and health and contribute to discussions on the widening scope of pse versus the consolidation of the core topics of pse highlights how the process systems engineering community contributes to the sustainability of modern society establishes the core products of process systems engineering defines the future challenges of process systems engineering

otorhinolaryngology head neck surgery is the latest edition of this comprehensive two volume guide to all the sub specialties of otorhinolaryngology

including brand new chapters and the most recent developments in the field the two volumes are divided into six extensive sections covering rhinology endoscopic sinus surgery facial plastics head and neck cranial base and oncology laryngology otology in this new edition endoscopic sinus surgery is given its own section encompassing all aspects of this surgery and an entirely new section on otology is comprised of 37 chapters including otitis media and cochlear implants the facial plastics section provides information on dermabrasion chemical peels laser treatment botox and rhinoplasty amongst many other topics new topics in this edition include laryngopharyngeal reflux trauma and stenosis of the larynx and laryngeal cancer bringing the text firmly up to date illustrated in full colour across 2000 pages this vast two volume set is an ideal source of reference for otorhinolaryngology practitioners and residents key points new edition of comprehensive two volume set covering all sub specialties in otorhinolaryngology previous edition published 2009 9788184486797 new sections on endoscopic sinus surgery and otology new topics include laryngopharyngeal reflux trauma and stenosis of the larynx and laryngeal cancer

molecular forensics offers a comprehensive coverage of the increasingly important role that molecular analysis plays within forensic science starting with a broad introduction of modern forensic molecular technologies the text covers key issues from the initial scenes of crime sampling to the use of evidential material in the prosecution of legal cases the book also explores the questions raised by the growing debate on the applications of national dna databases and the resulting challenges of developing maintaining and curating such vast data structures the broader range of applications to non human cases is also discussed as are the statistical pitfalls of using so called unique data such as dna profiles and the ethical considerations of national dna databases an invaluable reference for students taking courses within the forensic and biomedical sciences and also useful for practitioners in the field looking for a broad overview of the subject provides a comprehensive overview of modern forensic molecular technologies explores the growing debate on the applications of national dna databases discusses the initial phases of investigation to the conclusion of cases involving molecular forensic analysis

reducing and managing humanity s demand for energy is a fundamental part of the effort to mitigate climate change this comprehensive text lays out the theory and practice of how things must change if we are to meet our energy needs sustainably

includes selected papers from meetings of the society and of its sections
